Profile

Python Django Backend Developer skilled in building secure, scalable, and efficient web applications and RESTful APIs. Experienced in Django REST Framework, database management, authentication, API development, and clean backend architecture. Passionate about problem-solving and developing reliable software following modern coding practices.

Training & Certifications

09/2025 – Present
Dhaka Bangladesh

aiQuest Intelligence

Python & Django Backend Development

- Developed secure RESTful APIs using **Django REST Framework (DRF)**.
- Optimized database operations using **Django ORM** and schema migrations.
- Implemented authentication and authorization using **JWT and OAuth2**.
- Built modular backend systems following **clean architecture and PEP 8**.
- Tested APIs using **Postman** and developed unit tests.

Education

08/2017 – 04/2026
Bogura Bangladesh

Diploma in Engineering (Computer Technology)

TMSS Technical Institute (TTI)

Board: Bangladesh Technical Education Board (BTEB)

01/2016 – 05/2017
Bogura Bangladesh

Secondary School Certificate (SSC)

Jamur hat dakhil madrasah

Board: Madrasah Education Board

Skills

Programming Languages

Python • C • PHP

Database

PostgreSQL • MySQL • SQLite3

Tools

VS Code • Postman • PyCharm •
PgAdmin • **MySQL**

Frameworks

Django • Django REST
Framework (DRF)

Version Control

Git • GitHub

Concepts

REST API • OOP • DSA •
MVC/MVT • Authentication •
JWT

Frontend

HTML5 • CSS3 • Bootstrap •
JavaScript (ES6) • AJAX

Deployment & DevOps

Docker • PythonAnywhere

Projects

Django E-Commerce Web Based Application 📄

A fully functional web application built with Django, focused on seamless user experience and secure transactions.

- Developed a **full-featured e-commerce platform** using **Django** with database-driven product management.

- Implemented **user authentication** and **profile management** with secure access control.
- Built **advanced product browsing** with **category-based filtering** and product search.
- Developed **persistent shopping cart functionality** with **quantity management** and **automatic total calculation**.
- Implemented a **checkout and order management system** for processing customer orders.
- Added **server-side validation** and optimized database operations using **Django ORM**.
- Designed a **responsive and interactive UI** using **HTML, CSS, Bootstrap**, and **JavaScript**.

Django E-Commerce Api Baesd Application [↗](#)

A scalable headless ecommerce backend designed to provide a seamless shopping experience through RESTful services.

- **Product Management:** Built detailed APIs for category-based browsing, product filtering, and search functionality.
- **Cart & Order System:** Developed complex logic for persistent shopping carts and secure order processing workflows.
- **Order Management:** Implemented order creation, status tracking, and order history functionality with proper validation and business logic.
- **Data Integrity:** Implemented robust server-side validation and optimized **Django ORM** queries for efficiently handling large product catalogs and user data.

Django Portfolio Web Application [↗](#)

A personal portfolio website developed using Django to showcase projects, skills, experience, and professional information.

- Developed the portfolio website using **Django** with a structured and maintainable backend.
- Implemented **Django REST Framework (DRF)** for RESTful API development.
- Integrated **JWT authentication** using **Simple JWT** for secure API authentication.
- Used **MySQL** for database management and **Django ORM** for database operations.
- Integrated **Redis and Celery** for background task processing.
- Implemented **Django Channels** and **ASGI** support for asynchronous functionality.
- Added **CKEditor** for rich-text content management and **Django Unfold** for an enhanced admin interface.
- Implemented **CORS** handling and environment variable management using **python-dotenv**.
- Configured production-related tools including **WhiteNoise** for static files.

Languages

Bangla, English
